HEAT Leaders Applaud EPA Administrator Zeldin's Deregulatory Action

WASHINGTON, DC – Today, RSC House Energy Action Team (HEAT) Chairman Rep. Troy Balderson (OH-12) released the following statement after EPA Administrator Lee Zeldin announced plans for the agency to reconsider numerous EPA regulations:

“Under the leadership of President Trump and Administrator Lee Zeldin, the EPA is taking desperately needed action to end the disastrous ‘Green New Deal’ and restore common sense to the agency’s regulatory regime. From revising the ‘Waters of the United States’ rule to overhauling the Biden administration’s most egregious regulations such as the electric vehicle mandate and ‘Clean Power Plan 2.0,’ the EPA is putting our country on the path to energy dominance and economic prosperity, all while ensuring America remains blessed with clean air and water.”
